

UNIFLEX
Medical Packaging

Because you can't take chances.

2009
catalog

Because you can't take chances.

Uniflex is your complete source for high-quality, valuable hospital and laboratory packaging in healthcare facilities around the world.

We manufacture a diverse line of bags for specimen transport, personal belongings, kit packaging, emergency rooms, respiratory set-ups, and many other hospital and laboratory procedures. All of our products can be custom imprinted with hospital or laboratory names, logos, messages or special instructions.

Uniflex bags are 100% disposable, recyclable and many have unique patented features. Uniflex products are sold through the finest medical supply companies.

For almost 40 years, whenever new products have been introduced, Uniflex has been in the forefront, combining quality and service with a unique ability to produce extraordinary graphics on polyethylene bags.

The products we've designed for the healthcare worker's safety, meet or exceed OSHA regulations and NCCLS standards. A number of them have been created at the request of healthcare workers who depend on them daily.

Yours may be one of the thousands of institutions now benefiting from Uniflex hospital and laboratory products.

If not, you're in for a rewarding relationship. You'll be joining a partnership that has proven successful for almost 4 decades and has become standard in hospitals and laboratories around the world.

12 -----Dressing Disposal Bags	

Features:

- The only bag featuring the patented liquid-tight, Press and Close® adhesive closure system. Simply peel away the release liner and press to close. The separate outside pocket holds the requisition slip
- It's the original patented adhesive closure with no "glove-to-adhesive" contact.
- Once closed, the bag stays closed, even in pneumatic tube systems
- Remains closed if air is trapped inside, or if "grabbed," and won't "pop open"
- Available in single pocket versions when requisitions are not used, or in diagnostic kit packaging
- To open, simply snap at score
- Speci-Gard® is disposable, eliminating the possibility of cross contamination caused by reusing bags
- Manufactured with Micro-Tex™ polyethylene, for slip-free handling

95-600BDES

6"W x 10" H Double pocket bag with Press and Close® liquid-tight closure. Printed with biohazard logo and instructions for use. Each bag includes a pre-inserted super absorbent tested to absorb up to 60 ml of liquid.
